

RAG Task – Queries

Run each query below against your RAG pipeline (retrieval + LLM call via API) using the .pdf files “knowledge base data” as the knowledge base for your RAG pipeline.

Each query returns one code fragment. Concatenate the five fragments, in the order given below, joined by hyphens, to form your final submission code.

****NOTE:**** Your RAG pipeline will be verified upon submission. Please refrain from using any unfair or unauthorized methods to obtain the answers. ****AI tools may be used to assist with building the RAG pipeline code.****

****Query 1:**** According to incident PCF-0091 at Plumber Orbital Holding Ring 4, what was the Containment Override Code issued for Vilgax during the breach?

****Query 2:**** In the Bellwood Regional Veterinary Annex incident PCF-0114 involving Dr. Animo, what Bio-Hybrid Diagnostic Code was recorded?

****Query 3:**** For the Undertown Sub-Level Vault 7 theft filed under PCF-0158 involving the Forever Knights Relic Chapter, what Relic Retrieval Code was assigned?

****Query 4:**** During the Null Void Relay Station 2 malfunction logged as PCF-0173, what Portal Stabilization Code was applied to the containment grid?

****Query 5:**** In the Galvan Prime Remote Diagnostics Lab report PCF-0206 on Omnitrix DNA Archive Core corruption, what DNA Archive Decryption Code was issued?
