

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-009

Subject:	Hex
Classification:	Human (Spellcaster)
Domain:	Ritual Disturbance
Location:	Mount Rushmore Annex
Incident No.:	PCF-2880

OVERVIEW

This file documents a Plumber field response concerning Hex, logged under a ritual disturbance classification at Mount Rushmore Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Hex indicates a pattern of activity concentrated around Mount Rushmore Annex and comparable sites.

Hex is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving ritual disturbance.

No unusual physiological readings were noted for Hex during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

At 02:48, the incident was formally closed pending review by the Central Depot oversight committee.

At approximately 21:15, direct visual confirmation of Hex was logged by the responding unit.

Shortly after 23:02, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

By 07:45, a Plumber response unit had been dispatched to assess the situation at Mount Rushmore Annex.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 09:20, field sensors first registered anomalous activity in the vicinity of Mount Rushmore Annex.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Containment Override Code: C1M

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Prior documentation on Hex indicates a pattern of activity concentrated around Mount Rushmore Annex and comparable sites.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No unusual physiological readings were noted for Hex during this incident beyond what is typical for prior encounters of this classification.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.
