

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-038

Subject:	Facility Systems Office
Classification:	N/A
Domain:	Climate Control And Facility Upkeep
Location:	Plumber Central Depot, Utilities Wing
Incident No.:	N/A

OVERVIEW

This file documents a Plumber field response concerning Facility Systems Office, logged under a climate control and facility upkeep classification at Plumber Central Depot, Utilities Wing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Facility Systems Office during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Facility Systems Office are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Facility Systems Office indicates a pattern of activity concentrated around Plumber Central Depot, Utilities Wing and comparable sites.

Facility Systems Office is classified under Plumber records as N/A, associated primarily with incidents involving climate control and facility upkeep.

INCIDENT TIMELINE

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

By 07:45, a Plumber response unit had been dispatched to assess the situation at Plumber Central Depot, Utilities Wing.

Shortly after 21:15, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 21:15, the incident was formally closed pending review by the Central Depot oversight committee.

At approximately 15:55, direct visual confirmation of Facility Systems Office was logged by the responding unit.

At 23:02, a secondary team arrived to assist with cleanup and evidence cataloguing.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Facility Systems Office is classified under Plumber records as N/A, associated primarily with incidents involving climate control and facility upkeep.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.
