

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-056

Subject:	Malware
Classification:	Galvanic Mechomorph
Domain:	Systems Corruption Outbreak
Location:	Galvan B Tech Foundry
Incident No.:	PCF-3126

OVERVIEW

This file documents a Plumber field response concerning Malware, logged under a systems corruption outbreak classification at Galvan B Tech Foundry. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Malware indicates a pattern of activity concentrated around Galvan B Tech Foundry and comparable sites.

No unusual physiological readings were noted for Malware during this incident beyond what is typical for prior encounters of this classification.

Malware is classified under Plumber records as Galvanic Mechomorph, associated primarily with incidents involving systems corruption outbreak.

Threat assessments for Malware are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

By 02:48, the situation had been assessed as stable enough to proceed with standard documentation protocol.

By 11:05, a Plumber response unit had been dispatched to assess the situation at Galvan B Tech Foundry.

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

At 18:30, the incident was formally closed pending review by the Central Depot oversight committee.

At 21:15, containment procedures appropriate to a systems corruption outbreak scenario were initiated.

At approximately 02:48, direct visual confirmation of Malware was logged by the responding unit.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Prior documentation on Malware indicates a pattern of activity concentrated around Galvan B Tech Foundry and comparable sites.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

No unusual physiological readings were noted for Malware during this incident beyond what is typical for prior encounters of this classification.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Malware is classified under Plumber records as Galvanic Mechomorph, associated primarily with incidents involving systems corruption outbreak.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Threat assessments for Malware are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.
