

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-008

Subject:	Hex
Classification:	Human (Spellcaster)
Domain:	Ritual Disturbance
Location:	Mount Rushmore Annex
Incident No.:	PCF-2696

OVERVIEW

This file documents a Plumber field response concerning Hex, logged under a ritual disturbance classification at Mount Rushmore Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Hex during this incident beyond what is typical for prior encounters of this classification.

Hex is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving ritual disturbance.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Hex indicates a pattern of activity concentrated around Mount Rushmore Annex and comparable sites.

INCIDENT TIMELINE

By 21:15, the situation had been assessed as stable enough to proceed with standard documentation protocol.

By 23:02, a Plumber response unit had been dispatched to assess the situation at Mount Rushmore Annex.

At 09:20, containment procedures appropriate to a ritual disturbance scenario were initiated.

At 09:20, field sensors first registered anomalous activity in the vicinity of Mount Rushmore Annex.

Shortly after 15:55, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At approximately 09:20, direct visual confirmation of Hex was logged by the responding unit.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Containment Override Code: S8G

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Hex is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving ritual disturbance.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.
