

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-025

Subject:	Kevin Levin
Classification:	Osmosian
Domain:	Unauthorized Tech Absorption
Location:	Bellwood Scrapyard 12
Incident No.:	PCF-2899

OVERVIEW

This file documents a Plumber field response concerning Kevin Levin, logged under a unauthorized tech absorption classification at Bellwood Scrapyard 12. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Threat assessments for Kevin Levin are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Kevin Levin indicates a pattern of activity concentrated around Bellwood Scrapyard 12 and comparable sites.

No unusual physiological readings were noted for Kevin Levin during this incident beyond what is typical for prior encounters of this classification.

Kevin Levin is classified under Plumber records as Osmosian, associated primarily with incidents involving unauthorized tech absorption.

INCIDENT TIMELINE

Shortly after 11:05, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 03:12, containment procedures appropriate to a unauthorized tech absorption scenario were initiated.

At 15:55, a secondary team arrived to assist with cleanup and evidence cataloguing.

At approximately 03:12, direct visual confirmation of Kevin Levin was logged by the responding unit.

By 03:12, the situation had been assessed as stable enough to proceed with standard documentation protocol.

By 15:55, a Plumber response unit had been dispatched to assess the situation at Bellwood Scrapyard 12.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Portal Stabilization Code: N3J

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

APPENDIX

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No unusual physiological readings were noted for Kevin Levin during this incident beyond what is typical for prior encounters of this classification.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Prior documentation on Kevin Levin indicates a pattern of activity concentrated around Bellwood Scrapyard 12 and comparable sites.

Threat assessments for Kevin Levin are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Kevin Levin is classified under Plumber records as Osmosian, associated primarily with incidents involving unauthorized tech absorption.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.
