

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-006

Subject:	Charmcaster
Classification:	Human (Spellcaster)
Domain:	Mana Artifact Misuse
Location:	Ledgerdomain Border Crossing
Incident No.:	PCF-2543

OVERVIEW

This file documents a Plumber field response concerning Charmcaster, logged under a mana artifact misuse classification at Ledgerdomain Border Crossing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Charmcaster are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

INCIDENT TIMELINE

By 03:12, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At approximately 23:02, direct visual confirmation of Charmcaster was logged by the responding unit.

At 11:05, the incident was formally closed pending review by the Central Depot oversight committee.

By 02:48, a Plumber response unit had been dispatched to assess the situation at Ledgerdomain Border Crossing.

Shortly after 21:15, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 23:02, a secondary team arrived to assist with cleanup and evidence cataloguing.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Portal Stabilization Code: N3Z

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.
