

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-074

Subject:	Zombozo
Classification:	Human (Fear Feeder)
Domain:	Carnival-Based Fear Harvesting
Location:	Route 66 Travelling Grounds
Incident No.:	PCF-3671

OVERVIEW

This file documents a Plumber field response concerning Zombozo, logged under a carnival-based fear harvesting classification at Route 66 Travelling Grounds. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Zombozo is classified under Plumber records as Human (Fear Feeder), associated primarily with incidents involving carnival-based fear harvesting.

Prior documentation on Zombozo indicates a pattern of activity concentrated around Route 66 Travelling Grounds and comparable sites.

Threat assessments for Zombozo are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Zombozo during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

By 07:45, a Plumber response unit had been dispatched to assess the situation at Route 66 Travelling Grounds.

At 23:02, containment procedures appropriate to a carnival-based fear harvesting scenario were initiated.

At approximately 23:02, direct visual confirmation of Zombozo was logged by the responding unit.

At 09:20, field sensors first registered anomalous activity in the vicinity of Route 66 Travelling Grounds.

At 07:45, the incident was formally closed pending review by the Central Depot oversight committee.

At 23:02, a secondary team arrived to assist with cleanup and evidence cataloguing.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.
