

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-043

Subject:	Dr. Animo
Classification:	Human (Mutate Technician)
Domain:	Bio-Hybrid Experiment Malfunction
Location:	Bellwood Regional Veterinary Annex
Incident No.:	PCF-3588

OVERVIEW

This file documents a Plumber field response concerning Dr. Animo, logged under a bio-hybrid experiment malfunction classification at Bellwood Regional Veterinary Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Dr. Animo is classified under Plumber records as Human (Mutate Technician), associated primarily with incidents involving bio-hybrid experiment malfunction.

No unusual physiological readings were noted for Dr. Animo during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Dr. Animo are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Dr. Animo indicates a pattern of activity concentrated around Bellwood Regional Veterinary Annex and comparable sites.

INCIDENT TIMELINE

By 18:30, a Plumber response unit had been dispatched to assess the situation at Bellwood Regional Veterinary Annex.

At 07:45, field sensors first registered anomalous activity in the vicinity of Bellwood Regional Veterinary Annex.

Shortly after 18:30, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 07:45, a secondary team arrived to assist with cleanup and evidence cataloguing.

At 18:30, the incident was formally closed pending review by the Central Depot oversight committee.

By 21:15, the situation had been assessed as stable enough to proceed with standard documentation protocol.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Threat assessments for Dr. Animo are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.
