

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-077

Subject:	Albedo
Classification:	Galvan (rogue)
Domain:	Unauthorized Omnitrix Replication
Location:	Galvan Mark II Research Annex
Incident No.:	PCF-3012

OVERVIEW

This file documents a Plumber field response concerning Albedo, logged under a unauthorized Omnitrix replication classification at Galvan Mark II Research Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Albedo indicates a pattern of activity concentrated around Galvan Mark II Research Annex and comparable sites.

Threat assessments for Albedo are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Albedo is classified under Plumber records as Galvan (rogue), associated primarily with incidents involving unauthorized Omnitrix replication.

No unusual physiological readings were noted for Albedo during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 15:55, field sensors first registered anomalous activity in the vicinity of Galvan Mark II Research Annex.

At approximately 18:30, direct visual confirmation of Albedo was logged by the responding unit.

Shortly after 15:55, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 11:05, the incident was formally closed pending review by the Central Depot oversight committee.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Prior documentation on Albedo indicates a pattern of activity concentrated around Galvan Mark II Research Annex and comparable sites.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.
