

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-030

Subject:	Attea
Classification:	Incursean
Domain:	Unsanctioned Fleet Incursion
Location:	Incursean Border Marker 5
Incident No.:	PCF-2921

OVERVIEW

This file documents a Plumber field response concerning Attea, logged under a unsanctioned fleet incursion classification at Incursean Border Marker 5. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Threat assessments for Attea are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Attea during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Attea indicates a pattern of activity concentrated around Incursean Border Marker 5 and comparable sites.

Attea is classified under Plumber records as Incursean, associated primarily with incidents involving unsanctioned fleet incursion.

INCIDENT TIMELINE

At 23:02, field sensors first registered anomalous activity in the vicinity of Incursean Border Marker 5.

At 09:20, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 07:45, a Plumber response unit had been dispatched to assess the situation at Incursean Border Marker 5.

At 09:20, containment procedures appropriate to a unsanctioned fleet incursion scenario were initiated.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At approximately 21:15, direct visual confirmation of Attea was logged by the responding unit.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Portal Stabilization Code: Z6T

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Attea is classified under Plumber records as Incursean, associated primarily with incidents involving unsanctioned fleet incursion.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Threat assessments for Attea are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Prior documentation on Attea indicates a pattern of activity concentrated around Incursean Border Marker 5 and comparable sites.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No unusual physiological readings were noted for Attea during this incident beyond what is typical for prior encounters of this classification.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.
