

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-071

Subject:	Charmcaster
Classification:	Human (Spellcaster)
Domain:	Mana Artifact Misuse
Location:	Ledgerdomain Border Crossing
Incident No.:	PCF-3949

OVERVIEW

This file documents a Plumber field response concerning Charmcaster, logged under a mana artifact misuse classification at Ledgerdomain Border Crossing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Charmcaster are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

INCIDENT TIMELINE

At approximately 02:48, direct visual confirmation of Charmcaster was logged by the responding unit.

By 21:15, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 13:40, containment procedures appropriate to a mana artifact misuse scenario were initiated.

At 02:48, field sensors first registered anomalous activity in the vicinity of Ledgerdomain Border Crossing.

At 18:30, the incident was formally closed pending review by the Central Depot oversight committee.

By 13:40, a Plumber response unit had been dispatched to assess the situation at Ledgerdomain Border Crossing.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event

involving extraterrestrial technology, biology, or personnel.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.
