

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-058

Subject:	Khyber
Classification:	Tuffungulate Handler
Domain:	Unlicensed Predator Transport
Location:	Khoros Trade Waypoint
Incident No.:	PCF-3696

OVERVIEW

This file documents a Plumber field response concerning Khyber, logged under a unlicensed predator transport classification at Khoros Trade Waypoint. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Khyber is classified under Plumber records as Tuffungulate Handler, associated primarily with incidents involving unlicensed predator transport.

Threat assessments for Khyber are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Khyber indicates a pattern of activity concentrated around Khoros Trade Waypoint and comparable sites.

No unusual physiological readings were noted for Khyber during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At 15:55, containment procedures appropriate to a unlicensed predator transport scenario were initiated.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

At 02:48, the incident was formally closed pending review by the Central Depot oversight committee.

By 15:55, a Plumber response unit had been dispatched to assess the situation at Khoros Trade Waypoint.

At approximately 21:15, direct visual confirmation of Khyber was logged by the responding unit.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended

directly in the archive.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

APPENDIX

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Prior documentation on Khyber indicates a pattern of activity concentrated around Khoros Trade Waypoint and comparable sites.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.
