

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-002

Subject:	Dr. Animo
Classification:	Human (Mutate Technician)
Domain:	Bio-Hybrid Experiment Malfunction
Location:	Bellwood Regional Veterinary Annex
Incident No.:	PCF-0114

OVERVIEW

This file documents a Plumber field response concerning Dr. Animo, logged under a bio-hybrid experiment malfunction classification at Bellwood Regional Veterinary Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Dr. Animo is classified under Plumber records as Human (Mutate Technician), associated primarily with incidents involving bio-hybrid experiment malfunction.

Threat assessments for Dr. Animo are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Dr. Animo indicates a pattern of activity concentrated around Bellwood Regional Veterinary Annex and comparable sites.

No unusual physiological readings were noted for Dr. Animo during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At approximately 07:45, direct visual confirmation of Dr. Animo was logged by the responding unit.

At 11:05, field sensors first registered anomalous activity in the vicinity of Bellwood Regional Veterinary Annex.

Shortly after 18:30, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 21:15, containment procedures appropriate to a bio-hybrid experiment malfunction scenario were initiated.

By 07:45, a Plumber response unit had been dispatched to assess the situation at Bellwood Regional Veterinary Annex.

At 11:05, the incident was formally closed pending review by the Central Depot oversight committee.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Bio-Hybrid Diagnostic Code: N3W

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.
