---

## OVERVIEW

This file documents a Plumber field response concerning Sixsix, logged under a bounty contract violation classification at Plumber Deep Space Outpost 3. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

## SUBJECT PROFILE

Sixsix is classified under Plumber records as Rooter Drone, associated primarily with incidents involving bounty contract violation.

Prior documentation on Sixsix indicates a pattern of activity concentrated around Plumber Deep Space Outpost 3 and comparable sites.

No unusual physiological readings were noted for Sixsix during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Sixsix are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

## INCIDENT TIMELINE

By 02:48, a Plumber response unit had been dispatched to assess the situation at Plumber Deep Space Outpost 3.

At approximately 11:05, direct visual confirmation of Sixsix was logged by the responding unit.

By 11:05, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 07:45, field sensors first registered anomalous activity in the vicinity of Plumber Deep Space Outpost 3.

At 02:48, containment procedures appropriate to a bounty contract violation scenario were initiated.

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

## TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Bio-Hybrid Diagnostic Code: F8X

This code is recorded here solely for archival completeness and is not required for standard case review.

## PROCEDURAL NOTES

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

## APPENDIX

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes

available.
