

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-026

Subject:	Khyber
Classification:	Tuffungulate Handler
Domain:	Unlicensed Predator Transport
Location:	Khoros Trade Waypoint
Incident No.:	PCF-2058

OVERVIEW

This file documents a Plumber field response concerning Khyber, logged under a unlicensed predator transport classification at Khoros Trade Waypoint. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Khyber is classified under Plumber records as Tuffungulate Handler, associated primarily with incidents involving unlicensed predator transport.

Prior documentation on Khyber indicates a pattern of activity concentrated around Khoros Trade Waypoint and comparable sites.

Threat assessments for Khyber are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Khyber during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

By 09:20, a Plumber response unit had been dispatched to assess the situation at Khoros Trade Waypoint.

At 23:02, a secondary team arrived to assist with cleanup and evidence cataloguing.

At approximately 21:15, direct visual confirmation of Khyber was logged by the responding unit.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

Shortly after 21:15, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 21:15, field sensors first registered anomalous activity in the vicinity of Khoros Trade Waypoint.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Portal Stabilization Code: S5W

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

No unusual physiological readings were noted for Khyber during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Khyber indicates a pattern of activity concentrated around Khoros Trade Waypoint and comparable sites.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Threat assessments for Khyber are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Khyber is classified under Plumber records as Tuffungulate Handler, associated primarily with incidents involving unlicensed predator transport.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.
