

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-080

Subject:	Malware
Classification:	Galvanic Mechomorph
Domain:	Systems Corruption Outbreak
Location:	Galvan B Tech Foundry
Incident No.:	PCF-3198

OVERVIEW

This file documents a Plumber field response concerning Malware, logged under a systems corruption outbreak classification at Galvan B Tech Foundry. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Malware indicates a pattern of activity concentrated around Galvan B Tech Foundry and comparable sites.

Malware is classified under Plumber records as Galvanic Mechomorph, associated primarily with incidents involving systems corruption outbreak.

No unusual physiological readings were noted for Malware during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Malware are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

At approximately 23:02, direct visual confirmation of Malware was logged by the responding unit.

By 09:20, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 23:02, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 11:05, a Plumber response unit had been dispatched to assess the situation at Galvan B Tech Foundry.

Shortly after 23:02, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 23:02, the incident was formally closed pending review by the Central Depot oversight committee.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Prior documentation on Malware indicates a pattern of activity concentrated around Galvan B Tech Foundry and comparable sites.

Threat assessments for Malware are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.
