

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-087

Subject:	Personnel Records Office
Classification:	N/A
Domain:	Staffing And Shift Rotation Logs
Location:	Plumber Administrative Wing
Incident No.:	PCF-3520

OVERVIEW

This file documents a Plumber field response concerning Personnel Records Office, logged under a staffing and shift rotation logs classification at Plumber Administrative Wing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Personnel Records Office during this incident beyond what is typical for prior encounters of this classification.

Personnel Records Office is classified under Plumber records as N/A, associated primarily with incidents involving staffing and shift rotation logs.

Threat assessments for Personnel Records Office are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Personnel Records Office indicates a pattern of activity concentrated around Plumber Administrative Wing and comparable sites.

INCIDENT TIMELINE

Shortly after 02:48, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 11:05, a Plumber response unit had been dispatched to assess the situation at Plumber Administrative Wing.

At 23:02, field sensors first registered anomalous activity in the vicinity of Plumber Administrative Wing.

At 18:30, the incident was formally closed pending review by the Central Depot oversight committee.

At approximately 23:02, direct visual confirmation of Personnel Records Office was logged by the responding unit.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Threat assessments for Personnel Records Office are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Personnel Records Office is classified under Plumber records as N/A, associated primarily with incidents involving staffing and shift rotation logs.
