

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-090

Subject:	Vilgax
Classification:	Chimera Sui Generis
Domain:	Containment Breach
Location:	Plumber Orbital Holding Ring 4
Incident No.:	PCF-3968

OVERVIEW

This file documents a Plumber field response concerning Vilgax, logged under a containment breach classification at Plumber Orbital Holding Ring 4. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.

Threat assessments for Vilgax are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

At approximately 03:12, direct visual confirmation of Vilgax was logged by the responding unit.

At 09:20, containment procedures appropriate to a containment breach scenario were initiated.

At 21:15, field sensors first registered anomalous activity in the vicinity of Plumber Orbital Holding Ring 4.

Shortly after 09:20, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 03:12, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 07:45, the situation had been assessed as stable enough to proceed with standard documentation protocol.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.
