

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-047

Subject:	Charmcaster
Classification:	Human (Spellcaster)
Domain:	Mana Artifact Misuse
Location:	Ledgerdomain Border Crossing
Incident No.:	PCF-3730

OVERVIEW

This file documents a Plumber field response concerning Charmcaster, logged under a mana artifact misuse classification at Ledgerdomain Border Crossing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

Threat assessments for Charmcaster are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

INCIDENT TIMELINE

By 13:40, a Plumber response unit had been dispatched to assess the situation at Ledgerdomain Border Crossing.

Shortly after 11:05, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 07:45, the incident was formally closed pending review by the Central Depot oversight committee.

At 11:05, field sensors first registered anomalous activity in the vicinity of Ledgerdomain Border Crossing.

At approximately 23:02, direct visual confirmation of Charmcaster was logged by the responding unit.

At 07:45, containment procedures appropriate to a mana artifact misuse scenario were initiated.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

APPENDIX

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Threat assessments for Charmcaster are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

No unusual physiological readings were noted for Charmcaster during this incident beyond what is typical for prior encounters of this classification.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Prior documentation on Charmcaster indicates a pattern of activity concentrated around Ledgerdomain Border Crossing and comparable sites.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Charmcaster is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving mana artifact misuse.

Threat assessments for Charmcaster are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.
