

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-042

Subject:	Vilgax
Classification:	Chimera Sui Generis
Domain:	Containment Breach
Location:	Plumber Orbital Holding Ring 4
Incident No.:	PCF-3479

OVERVIEW

This file documents a Plumber field response concerning Vilgax, logged under a containment breach classification at Plumber Orbital Holding Ring 4. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Threat assessments for Vilgax are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.

INCIDENT TIMELINE

Shortly after 11:05, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

By 23:02, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 23:02, containment procedures appropriate to a containment breach scenario were initiated.

At 07:45, a secondary team arrived to assist with cleanup and evidence cataloguing.

At approximately 03:12, direct visual confirmation of Vilgax was logged by the responding unit.

At 11:05, field sensors first registered anomalous activity in the vicinity of Plumber Orbital Holding Ring 4.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

APPENDIX

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Threat assessments for Vilgax are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.
