

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-040

Subject:	Personnel Records Office
Classification:	N/A
Domain:	Staffing And Shift Rotation Logs
Location:	Plumber Administrative Wing
Incident No.:	N/A

OVERVIEW

This file documents a Plumber field response concerning Personnel Records Office, logged under a staffing and shift rotation logs classification at Plumber Administrative Wing. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Personnel Records Office is classified under Plumber records as N/A, associated primarily with incidents involving staffing and shift rotation logs.

Prior documentation on Personnel Records Office indicates a pattern of activity concentrated around Plumber Administrative Wing and comparable sites.

Threat assessments for Personnel Records Office are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Personnel Records Office during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At 07:45, a secondary team arrived to assist with cleanup and evidence cataloguing.

Shortly after 03:12, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

By 23:02, a Plumber response unit had been dispatched to assess the situation at Plumber Administrative Wing.

At 23:02, the incident was formally closed pending review by the Central Depot oversight committee.

At approximately 07:45, direct visual confirmation of Personnel Records Office was logged by the responding unit.

At 15:55, field sensors first registered anomalous activity in the vicinity of Plumber Administrative Wing.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.
