

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-001

Subject:	Vilgax
Classification:	Chimera Sui Generis
Domain:	Containment Breach
Location:	Plumber Orbital Holding Ring 4
Incident No.:	PCF-0091

OVERVIEW

This file documents a Plumber field response concerning Vilgax, logged under a containment breach classification at Plumber Orbital Holding Ring 4. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.

Threat assessments for Vilgax are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.

INCIDENT TIMELINE

At approximately 09:20, direct visual confirmation of Vilgax was logged by the responding unit.

By 11:05, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 15:55, the incident was formally closed pending review by the Central Depot oversight committee.

Shortly after 09:20, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 15:55, a secondary team arrived to assist with cleanup and evidence cataloguing.

At 18:30, containment procedures appropriate to a containment breach scenario were initiated.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Containment Override Code: X1X

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

APPENDIX

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

No unusual physiological readings were noted for Vilgax during this incident beyond what is typical for prior encounters of this classification.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Vilgax is classified under Plumber records as Chimera Sui Generis, associated primarily with incidents involving containment breach.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Prior documentation on Vilgax indicates a pattern of activity concentrated around Plumber Orbital Holding Ring 4 and comparable sites.
