

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-012

Subject:	Dr. Viktor
Classification:	Human (Reanimation Specialist)
Domain:	Unauthorized Reanimation Tech
Location:	Mount Rushmore Sub-Basement
Incident No.:	PCF-2601

OVERVIEW

This file documents a Plumber field response concerning Dr. Viktor, logged under a unauthorized reanimation tech classification at Mount Rushmore Sub-Basement. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

No unusual physiological readings were noted for Dr. Viktor during this incident beyond what is typical for prior encounters of this classification.

Threat assessments for Dr. Viktor are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Dr. Viktor is classified under Plumber records as Human (Reanimation Specialist), associated primarily with incidents involving unauthorized reanimation tech.

Prior documentation on Dr. Viktor indicates a pattern of activity concentrated around Mount Rushmore Sub-Basement and comparable sites.

INCIDENT TIMELINE

By 07:45, a Plumber response unit had been dispatched to assess the situation at Mount Rushmore Sub-Basement.

Shortly after 11:05, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 07:45, the incident was formally closed pending review by the Central Depot oversight committee.

At 03:12, field sensors first registered anomalous activity in the vicinity of Mount Rushmore Sub-Basement.

At 03:12, containment procedures appropriate to a unauthorized reanimation tech scenario were initiated.

By 11:05, the situation had been assessed as stable enough to proceed with standard documentation protocol.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Containment Override Code: K2V

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Dr. Viktor is classified under Plumber records as Human (Reanimation Specialist), associated primarily with incidents involving unauthorized reanimation tech.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Threat assessments for Dr. Viktor are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

No unusual physiological readings were noted for Dr. Viktor during this incident beyond what is typical for prior encounters of this classification.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Prior documentation on Dr. Viktor indicates a pattern of activity concentrated around Mount Rushmore Sub-Basement and comparable sites.
