

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-035

Subject:	Diagon
Classification:	Interdimensional Entity
Domain:	Dimensional Rift Containment
Location:	Forge of Creation Perimeter
Incident No.:	PCF-2774

OVERVIEW

This file documents a Plumber field response concerning Diagon, logged under a dimensional rift containment classification at Forge of Creation Perimeter. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Diagon indicates a pattern of activity concentrated around Forge of Creation Perimeter and comparable sites.

No unusual physiological readings were noted for Diagon during this incident beyond what is typical for prior encounters of this classification.

Diagon is classified under Plumber records as Interdimensional Entity, associated primarily with incidents involving dimensional rift containment.

Threat assessments for Diagon are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

At 18:30, containment procedures appropriate to a dimensional rift containment scenario were initiated.

Shortly after 18:30, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 18:30, the incident was formally closed pending review by the Central Depot oversight committee.

By 11:05, a Plumber response unit had been dispatched to assess the situation at Forge of Creation Perimeter.

At 23:02, field sensors first registered anomalous activity in the vicinity of Forge of Creation Perimeter.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Relic Retrieval Code: K6E

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Prior documentation on Diagon indicates a pattern of activity concentrated around Forge of Creation Perimeter and comparable sites.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Diagon is classified under Plumber records as Interdimensional Entity, associated primarily with incidents involving dimensional rift containment.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.
