

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-027

Subject:	Khyber
Classification:	Tuffungulate Handler
Domain:	Unlicensed Predator Transport
Location:	Khoros Trade Waypoint
Incident No.:	PCF-2494

OVERVIEW

This file documents a Plumber field response concerning Khyber, logged under a unlicensed predator transport classification at Khoros Trade Waypoint. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Khyber indicates a pattern of activity concentrated around Khoros Trade Waypoint and comparable sites.

Khyber is classified under Plumber records as Tuffungulate Handler, associated primarily with incidents involving unlicensed predator transport.

Threat assessments for Khyber are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Khyber during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At 18:30, containment procedures appropriate to a unlicensed predator transport scenario were initiated.

By 02:48, the situation had been assessed as stable enough to proceed with standard documentation protocol.

At 11:05, a secondary team arrived to assist with cleanup and evidence cataloguing.

Shortly after 02:48, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 02:48, field sensors first registered anomalous activity in the vicinity of Khoros Trade Waypoint.

At 09:20, the incident was formally closed pending review by the Central Depot oversight committee.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Portal Stabilization Code: S8C

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No unusual physiological readings were noted for Khyber during this incident beyond what is typical for prior encounters of this classification.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.
