

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-003

Subject:	Forever Knights Relic Chapter
Classification:	Human (Order of Knights)
Domain:	Alien Artifact Theft
Location:	Undertown Sub-Level Vault 7
Incident No.:	PCF-0158

OVERVIEW

This file documents a Plumber field response concerning Forever Knights Relic Chapter, logged under a alien artifact theft classification at Undertown Sub-Level Vault 7. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Threat assessments for Forever Knights Relic Chapter are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

Prior documentation on Forever Knights Relic Chapter indicates a pattern of activity concentrated around Undertown Sub-Level Vault 7 and comparable sites.

Forever Knights Relic Chapter is classified under Plumber records as Human (Order of Knights), associated primarily with incidents involving alien artifact theft.

No unusual physiological readings were noted for Forever Knights Relic Chapter during this incident beyond what is typical for prior encounters of this classification.

INCIDENT TIMELINE

At 13:40, containment procedures appropriate to a alien artifact theft scenario were initiated.

Shortly after 02:48, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

By 13:40, a Plumber response unit had been dispatched to assess the situation at Undertown Sub-Level Vault 7.

At approximately 02:48, direct visual confirmation of Forever Knights Relic Chapter was logged by the responding unit.

At 13:40, the incident was formally closed pending review by the Central Depot oversight committee.

At 02:48, field sensors first registered anomalous activity in the vicinity of Undertown Sub-Level Vault 7.

TECHNICAL DATA

Following standard resolution procedure, a technical code was generated and logged against this incident for archival cross-reference purposes.

Relic Retrieval Code: D6S

This code is recorded here solely for archival completeness and is not required for standard case review.

PROCEDURAL NOTES

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

APPENDIX

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Prior documentation on Forever Knights Relic Chapter indicates a pattern of activity concentrated around Undertown Sub-Level Vault 7 and comparable sites.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.
