

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-088

Subject:	Budget and Procurement Office
Classification:	N/A
Domain:	Quarterly Supply Procurement
Location:	Plumber Finance Annex
Incident No.:	PCF-3664

OVERVIEW

This file documents a Plumber field response concerning Budget and Procurement Office, logged under a quarterly supply procurement classification at Plumber Finance Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Budget and Procurement Office indicates a pattern of activity concentrated around Plumber Finance Annex and comparable sites.

No unusual physiological readings were noted for Budget and Procurement Office during this incident beyond what is typical for prior encounters of this classification.

Budget and Procurement Office is classified under Plumber records as N/A, associated primarily with incidents involving quarterly supply procurement.

Threat assessments for Budget and Procurement Office are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

At approximately 23:02, direct visual confirmation of Budget and Procurement Office was logged by the responding unit.

Shortly after 23:02, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

By 18:30, the situation had been assessed as stable enough to proceed with standard documentation protocol.

By 07:45, a Plumber response unit had been dispatched to assess the situation at Plumber Finance Annex.

At 02:48, the incident was formally closed pending review by the Central Depot oversight committee.

At 07:45, field sensors first registered anomalous activity in the vicinity of Plumber Finance Annex.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

APPENDIX

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

No unusual physiological readings were noted for Budget and Procurement Office during this incident beyond what is typical for prior encounters of this classification.
