

PLUMBER INTER-GALACTIC CASE FILE — PCF-CASE-048

Subject:	Hex
Classification:	Human (Spellcaster)
Domain:	Ritual Disturbance
Location:	Mount Rushmore Annex
Incident No.:	PCF-3139

OVERVIEW

This file documents a Plumber field response concerning Hex, logged under a ritual disturbance classification at Mount Rushmore Annex. The report below summarizes the chronological action log, subject profile notes, and technical appendix compiled by the responding unit.

SUBJECT PROFILE

Prior documentation on Hex indicates a pattern of activity concentrated around Mount Rushmore Annex and comparable sites.

No unusual physiological readings were noted for Hex during this incident beyond what is typical for prior encounters of this classification.

Hex is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving ritual disturbance.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

INCIDENT TIMELINE

Shortly after 15:55, communications with the response team were briefly disrupted, consistent with prior incidents of this type.

At 23:02, containment procedures appropriate to a ritual disturbance scenario were initiated.

At 09:20, the incident was formally closed pending review by the Central Depot oversight committee.

At 13:40, a secondary team arrived to assist with cleanup and evidence cataloguing.

By 13:40, a Plumber response unit had been dispatched to assess the situation at Mount Rushmore Annex.

At 23:02, field sensors first registered anomalous activity in the vicinity of Mount Rushmore Annex.

TECHNICAL DATA

No incident-specific technical code was generated for this report; standard monitoring equipment was used without configuration changes.

PROCEDURAL NOTES

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

APPENDIX

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.

No unusual physiological readings were noted for Hex during this incident beyond what is typical for prior encounters of this classification.

Prior documentation on Hex indicates a pattern of activity concentrated around Mount Rushmore Annex and comparable sites.

Equipment used during this response was inspected post-incident and returned to standard rotation without flagged defects.

This document was generated by the Plumber Case Management System and reviewed by a duty officer prior to archival. Any discrepancies should be reported through standard channels rather than amended directly in the archive.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Where applicable, technical reference codes noted in this document are valid only for the specific incident described herein and are superseded by any later-dated report referencing the same subject.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

All field agents are reminded that classification levels on this document restrict distribution to personnel who currently carry active Plumber Badge credentials. Handling instructions are listed in the cover section of the Plumber Operations Manual, Revision 12.

This appendix section is provided for completeness in accordance with archival formatting requirements and does not contain information beyond what is summarized in the main report body.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Hex is classified under Plumber records as Human (Spellcaster), associated primarily with incidents involving ritual disturbance.

Agents completing this form should verify subject identification against the most recent Plumber species registry before submission, as taxonomic reclassifications occur periodically as new data becomes available.

No additional casualties, injuries, or civilian exposures were reported in connection with this incident.

Appendix data collected during this incident has been archived alongside standard sensor logs and is available on request through the Central Depot records office.

This report is filed in accordance with Plumber Standard Operating Procedure 4.2, which requires a full incident summary, a subject profile, a chronological action log, and a technical appendix for any field event involving extraterrestrial technology, biology, or personnel.

Historical note: the Plumber archival system was migrated from the legacy Ectonurite ledger format to the current digital case-file format following the Central Depot reorganization. Older references may use deprecated file prefixes.

Routine archival review confirms that this file meets retention requirements under Plumber Directive 9, Section 3, governing long-term storage of field incident documentation.

Cross-referencing between case files is standard practice and should not be interpreted as an indication of a connected investigation unless explicitly noted in the Cross-Reference section below.

Threat assessments for Hex are periodically revised; agents should consult the most recent Plumber species or subject bulletin before field engagement.
